

LETTER OF INTENT

Preamble:

The aim of the European Network of River Museums (ENoRM) is to bring together representatives of European museums and institutions concerned with the history of inland navigation and related issues of trade and culture, and to enable them to talk freely, openly and progressively without establishing an official organization for this purpose. The exchange of information and experience concerning museum exhibits and historic objects owned by these institutions plays an important role in this cooperation. Personal relationships are essential – even in the era of electronic media which enable extensive and unlimited connectivity!

The institutions and their representatives taking part in ENoRM don't have to contribute financially or otherwise in a fixed way, defined by an official statute. But the effective work of ENoRM requires a commitment to be affiliated to the network and to cooperate in its efforts.

The declaration of cooperation:

I hereby declare to support the vision and the mission of ENoRM, and I declare my intent to contribute to its actions, within the scope of my capabilities.
